EDUCATION

New York Institute of Technology

Bachelor of science in Computer Science

Manhattan, NYC

Sep. 2025 – May 2026

Queens College (Transfer from New York Institute of Technology)

Bachelor of science in Computer Science

Flushing, NYC

Aug. 2026 – May 2029

EXPERIENCE

Coding Coach

TheCoderSchool

October 2025 – April 2026

Bayside, NYC

- Taught coding fundamentals (Scratch, Python) to 15+ students across skill levels, designing custom lesson plans tailored to each learner's pace and goals.
- Demonstrated classroom adaptability by substituting across classes, maintaining consistent progress for all students.
- Introduced project-based learning, guiding advanced students through building functional Python applications.

Backend Developer

Project Empower

August 2024 – January 2025

Remote

- Architected and implemented user authentication and API routing for a non-profit web platform serving low-income, first-generation college students.
- Engineered session management logic ensuring zero-error post-login routing across authenticated user flows.
- Co-organized the Project Empower Hackathon (Jul–Aug 2024) with 2,000+ participants and 200,000 dollars in prizes, coordinating logistics and participant communication.

IT Media Intern

Skylight Pharmacy

July 2025 – August 2025

Jamaica, NYC

- Produced promotional video content for Instagram and TikTok, growing digital brand engagement.
- Launched and managed Google Ads and Meta Ads campaigns, expanding audience reach for the pharmacy's digital presence.
- Streamlined internal data entry workflows and assisted with day-to-day IT support tasks

Cashier/Customer Service Lead

Go Detox

June 2021 – December 2023

Van Wyck, NYC

- Led a team of 3, managing daily operations and contributing to a 20–30 summer hours.
- Resolved technical issues with third-party delivery platforms (Uber Eats, DoorDash, Grubhub), reducing order errors and improving turnaround time under pressure.

PROJECTS

Pr-Review-Assistant | Typescript, React, Supabase, ClaudeAI, GroqAI

July 2026 – Present

- Developed a Full-stack web app using Typescript serving the backend and React as the frontend
- Implemented Github OAuth to get user's repositories
- The AI would look at the chosen pull request and help show vulnerabilities
- Used Groq for free AI service while using Claude to help with my planning and implementation

Non-Profit Student Database | Typescript, MongoDB

August 2025 – January 2026

- Architected the database schema and secure REST API routes for Project Empower's student-facing platform, handling authentication flows and role-based routing logic using Typescript and MongoDB.

TECHNICAL SKILLS

Languages: Java, Python, SQL(MySQL), Rust, Typescript

FrameWorks: React, Node.js, Flask, FastAPI

Developer Tools: Git, Docker, ClaudeAI, Visual Studio Code, IntelliJ, Linux(basics)

Certifications: YouScience(Java Certification), Mimo(Typescript Certification)
